

NGUYEN TRONG NGHIA

JAVA BACKEND DEVELOPER

nguyentrongnghia0379@gmail.com | 0949560379 | GitHub: <https://github.com/boy2407>

CAREER SUMMARY

Java Backend Developer with hands-on experience in AEM (Java/OSGi) at wearesection and in Spring Boot projects. Disciplined and dependable after 2 years of military service, and eager to learn and grow in a professional team.

SKILLS

- Languages: Java, C#, SQL, Python.
- Frameworks: Spring Boot, Spring Security, Hibernate/JPA, .NET 8, Entity Framework Core.
- Databases: PostgreSQL, SQL Server, MySQL.
- Tools: Docker, Git/GitHub, Postman, Swagger, Katalon.
- Others: SOLID principles, Design Patterns.

EXPERIENCE

SOFTWARE ENGINEER • WEARESECTION | May 2026 – Present

AEM Project (Adobe Experience Manager)

- Worked on backend features in Java using Sling Models, OSGi services and Servlets.
- Investigated and fixed bugs in existing components under the guidance of senior developers.
- Followed the team workflow: code reviews, Git branches and Jira tasks.

Katalon Project

- Wrote and maintained automated UI and API tests in Katalon Studio (Groovy).
- Ran regression tests before each release and reported bugs to the developers.

PROJECTS

SAIGONDEPOT – E-COMMERCE CATALOG | [Link](#) | Personal Project • Jul 2026 – Aug 2026

- Built REST APIs for the product catalog and ordering with Spring Boot, JPA/Hibernate and JWT login.
- Applied PostgreSQL full-text search (unaccent, pg_trgm) to support Vietnamese product search.
- Tech Stack: Java, Spring Boot, Spring Security, PostgreSQL, Flyway, Docker.

E-COMMERCE-API | [Link](#) | Course Project • Feb 2026 – May 2026

- Used Clean Architecture and CQRS; secured the APIs with JWT and policy-based access.
- Integrated RAG-based AI search with Semantic Kernel to recommend products to customers and assist admins with management tasks.
- Integrated MoMo payments: verified HMAC-SHA256 signatures and handled IPN callbacks to update orders.
- Tech Stack: .NET 8, EF Core, SQL Server, Redis, Docker, MediatR, xUnit.

BOOKSTORE API | [Link](#) | Course Project • Sep 2022 – Dec 2022

- Built REST APIs for books, categories, reviews, search and the cart with Django REST Framework.
- Added sign-up with email verification and token-based login.
- Integrated VNPAY online payments.
- Documented the APIs with Swagger (drf-yasg).
- Tech Stack: Python, Django, Django REST Framework, MySQL.

EDUCATION

Bachelor of Information Technology | VNUHCM - University of Information Technology

June 2022 – 2027 | GPA 3.5

Thesis: Classifying jobs and predicting salaries from Vietnamese job postings (PhoBERT, Python).
